Lambda School   2021
Full Stack Web Development &
Computer Science

Projects

Merchant Market Place

Through Merchant Market Place, customers and sellers can connect based on location, delivering services and goods that are local to the users.

HTML | CSS | JavaScript | React
Redux | AntDesign | FileStack

github.com/Lambda-School-Labs/
LabsPT13-Merchant-Marketplace-C-FE

Restaurant Passport

Customers can share their experiences when visiting a restaurant. Giving them a way to collect and share the experiences at these restaurants.

HTML | CSS | LESS | React | Redux

github.com/bw-restaurant-passport-1

FocusedKanban

A kanban board where users can build out their plans on the desktop, then use their mobile devices to keep track of their progress.

HTML | CSS | JavaScript | React
Redux | SQL | Knex | Express

github.com/aply333/FocusedKanBan

Snippet Tool

Tool for documenting code/text. Contents can be pasted or written into the editor. Then areas can be highlighted, which will have comments attached to.

HTML | CSS | JavaScript | React
Redux | SQL | Knex | Express
